LIST OF CONTENTS

NUMBER 1

T. TROMBETTI	1	Transfer by anisotropic scattering between subsets of the unit sphere of directions in linear transport theory
D. MENEGHETTI and D. A. KUCERA	19	Delineations of power, power-to-flow and inlet-temperature feedbacks of EBR-II
G. S. SRINIVASAN and O. P. SINGH	27	A multivariate pattern recognition analysis of BOR-60 sodium boiling noise data
W. S. YANG and T. J. DOWNAR	37	A linear time-dependent flux approximation for nuclide depletion based on a perturbation method
Z. BILANOVIC, G. CRIPPS and A. A. HARMS	43	Stability of the ^{251}Cf–^{252}Cf nuclear power cycle
Technical Note		
B. D. GANAPOL, P. RAVETTO and M. SUMINI	49	Application of a numerical Laplace transform inversion technique to a problem in reactor dynamics
	59	Book Review
	61	Corrigendum
	I	Software Survey Section: PROCWIC—static neutronic calculation of a nuclear reactor using elements of the MTR type
	V	Patents Section
	VII	Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 2

	i	Special Announcement
O. HORIBE and H. CHATANI	63	A new empirical rule for the prediction of around 14 MeV neutron reaction cross sections
EDWARD W. LARSEN and M. M. R. WILLIAMS	81	New Fokker–Planck derivation of heavy gas models for neutron thermalization
Y. NAKAJIMA, M. OHKUBO, Y. FURUTA, M. MIZUMOTO, M. SUGIMOTO and Y. KAWARASAKI	95	Measurements of ^{122}Sn neutron resonance parameters

C. J. GHO — 101 Extended Eisemann formalism for neutron diffusion coefficient calculation

T. B. RYVES, P. KOLKOWSKI and A. C. HOOLEY — 107 Ho, Pb and Bi cross sections for 14.3 MeV neutrons

Technical Note
E. SALINAS-RODRIGUEZ, R. F. RODRIGUEZ and H. S. WIO — 113 Spatial effects on the fluctuations of a nuclear power reactor

117 Meeting Announcement

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 3

i Editorial Announcement

G. MARLEAU, M. L. VERGAIN, A. HÉBERT and R. ROY — 119 Computation of the DP1 collision probabilities for spherical and cylindrical geometries

G. S. SRINIVASAN and O. P. SINGH — 135 New statistical features sensitive to sodium boiling noise

M. M. RAZZAQUE — 139 On application of heat pipes for passive shutdown heat removal in advanced liquid metal and gas-cooled reactor designs

H. AFARIDEH, S. A. DURRANI and K. RANDLE — 143 Angular distribution of fragments from the fission of ^{238}U induced by neutrons in the energy range 1–18 MeV

Algorithms
Z. WEISS — 153 A consistent definition of the number density of pseudo-isotopes

Technical Notes
K. KISHIDA — 157 Autoregressive model analysis and decay ratio

M. M. R. WILLIAMS — 161 The effect of fractal particle structure on aerosol coagulation

169 Current Papers in Nuclear Energy

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 4

K. N. GRIMM and D. MENEGHETTI 173 Power-induced power and power-to-flow transfer functions for EBR-II subassemblies

NAVA C. GARISTO and FRANK GARISTO 183 Transport of uranium through a cracked clay barrier

J. WOOD and C. R. E. DE OLIVEIRA 195 A finite element study of gamma ray transport

G. COJAZZI and M. MARSEGUERRA 207 Time variant AR-noise investigated via a fixed-lag Kalman smoother

Technical Note
N. ZAVALJEVSKI 217 A model for fuel shuffling and burnable absorbers optimization in low leakage PWRs

221 Book Review

223 Current Papers in Nuclear Energy

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 5

A. I. SHAMAOUN and G. C. SUMMERFIELD 229 Chemical binding effects on resonant scattering of neutrons

D. P. BURTE 239 Additional guideline for the design of BWR reload patterns

P. W. POON and J. D. LEWINS 245 Minimum fuel loading

G. T. PARKS 259 An exact transient solution for the forward Kolmogorov equation under the 'zero prompt lifetime' assumption

T. D. BEYNON and B. S. SIM 271 ^{10}Be and ^{14}C production rates in net-type CTR blankets

Technical Note
K. KATOH, S. HASEGAWA and A. SUZUKI — 279 An analysis on the efficient laser photoionization of atoms

283 Book Reviews

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 6

U. SALMI and J. D. LEWINS — 285 Kolmogorov equations of multiplying systems with fuel depletion

K. W. BURN — 293 Extension of the direct statistical approach to a volume parameter model (non-integer splitting)

H. KONNO, K. HAYASHI and Y. SHINOHARA — 317 On the origins of power oscillation in the NSRR

339 Book Review

341 Current Papers in Nuclear Energy

345 Information from the NRPB

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 7

I. PÁZSIT — 347 Sequential tests for failure detection

D. MENEGHETTI and D. A. KUCERA — 353 Feedback components of a Pu-fueled compared to a U-fueled 900 MWt LMR

G. G. M. COPPA, G. LAPENTA and P. RAVETTO — 363 Angular finite element techniques in neutron transport

R. ROY — 379 Anisotropic scattering for integral transport codes. Part 1. Slab assemblies

Technical Note
M. S. SRIDHARAN — 389 Simple analytical fits to fission-product decay heat

Letter to the Editors
MILLER B. SPANGLER — 393 Three Mile Island revisited

399 Book Review

401 Press Release from the NRPB

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 8

B. MAHALAKSHMI and P. MOHANAKRISHNAN — 403 Validation of a few-group 3-D core calculation scheme for FBRS by analysis of critical experiments

G.-S. CHEN — 415 Asymptotic behavior of multigroup diffusion equations with Xe feedback

B. OZGENER — 427 A comparison of the lumped and consistent source treatments in 3-D finite-element diffusion calculations

E. B. DAHL and D. C. SAHNI — 435 Nature of complex time eigenvalues of the one speed transport equation in a homogeneous sphere

Technical Note
S. GÜNGÖR — 455 Thorium utilization in an unmodified pressurized water reactor

461 Current Papers in Nuclear Energy

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 9

J. WOOD and H. AL-BAHADILI — 465 Monte Carlo photon transport for multilayer shields on the AMT DAP parallel computer

P. T. KRISHNA KUMAR — 483 Estimation of bounds for Monte Carlo uncertainty analysis by the technique of determinantal inequalities

TAKAYUKI MIZUNO, TATSUYA ITO and KIYOHISA OHTA — 487 The inherently-safe fluidized-bed boiling water reactor concept

R. KOZMA and J. E. HOOGENBOOM 493 Flow measurements using noise signals of axially displaced thermocouples

R. BORSARI, J. D. LEWINS and T. TROMBETTI 515 Invariance relations for bilinear functionals in the evaluation of the anisotropic scattering source

Algorithms

Z. WEISS 525 Optimal algorithm for the calculation of contributions to collision probabilities from a neutron path

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 10

G. F. THOMAS 531 Propensity for Fe(II)oxalate precipitation in CANDECON™ decontaminations of CANDU™ primary heat transport systems

J. L. RUSSELL JR 545 Plausibility argument for a suggested mechanism for cold fusion

M. GOSWAMI, F. AHMED and L. S. KOTHARI 549 Elastic coherent and incoherent scattering of thermal neutrons in natural lithium and its two isotopes

S. B. DEGWEKER and M. SRINIVASAN 555 Theoretical analysis of the variable dead time counter technique for passive neutron assay of plutonium

A. KUWAIFI, G. C. SUMMERFIELD and A. SHAMAOUN 565 Effect of non-constant $\Gamma_n(\varepsilon_j)$ on neutron resonance broadening—II. Harmonic oscillator

Y. NAKAJIMA, M. OHKUBO, M. SUGIMOTO, M. MIZUMOTO and Y. KAWARASAKI 569 Neutron resonances in ^{133}Cs

Technical Notes

E. SAJO 579 Application of G-transformation to reduce higher transcendental functions

S. B. DEGWEKER and M. SRINIVASAN 583 A simple dead time method for measuring the fraction of bunched neutronic emission in cold fusion experiments

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 11

S. TACZANOWSKI and J. CETNAR 587 One-dimensional modelling of neutron leakage from spherical shell assemblies with openings

J. D. LEWINS, T. TROMBETTI, G. T. PARKS and U. SALMI 593 Tensor developments of a stochastic variational principle

R. T. ACKROYD and M. M. NANNEH 603 Hybrid variational principles and synthesis method for finite element neutron transport calculations

635 Book Review

637 Current Papers in Nuclear Energy

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction

NUMBER 12

K. BEHRINGER, J. PIÑEYRO and J. MENNIG 643 Application of the Wiener–Hermite functional method to point reactor kinetics driven by random reactivity fluctuations

T. B. RYVES and P. KOLKOWSKI 657 The differential cross section for neutron–proton scattering at 14.5 MeV

K. HASHIMOTO, R. MIKI, T. ITOH and T. SHIBATA 667 Derivation of coupling coefficient from rod drop measurement in two-point reactors

KASEM N. ABOTEL and EDWARD W. LARSEN 673 A new computational approach to nuclear aerosol problems

N. S. GARIS and N. G. SJÖSTRAND 689 One-speed neutron transport eigenvalues for an infinite, two-medium slab lattice

Technical Note
D. P. BURTE 707 A co-ordinate system for reactor physics calculations in hexagonal geometry

I Software Survey Section

V Guidelines for the Preparation of Typescripts for Direct Reproduction
